Innovation That Protects

# API for 3SI Tracking Website

*Streamline your technology, improve your efficiency*

All 3SI tracking devices are managed on the secure and proprietary 3SI tracking website. For customers wishing to reduce the number of different applications used to manage security devices, 3SI has developed an API (application programming interface). This interface enables developers to write custom applications to receive and control their 3SI tracking devices on their preferred application.

## Your Partner In Cash And Asset Protection

• • • • •

Over 45 years of experience and specialized knowledge in the Security field

24/7 US-based support

Long-term relationships with the industry, built on trust and satisfaction

Partnered with over 7,000 Law Enforcement agencies

Over 10K criminals apprehended and \$100M in assets recovered

Only company offering both GPS Tracking AND Cash Protection Solutions

**If a Theft Occurs...** the 3SI API will forward all relevant information normally displayed on the 3SI tracking website (GPS position, battery status, device number, ...) via a secured internet tunnel to the customer application. This configuration allows customers to integrate the system to their own portal.

## Features

- Standardized API transmits information from and allows command of 3SI tracking devices
- Extensive online documentation for easy implementation
- Unlimited API calls
- Easy configuration of API end-points and keys
- Available controls for 3SI devices: ping, reset, chirp, beacon control, factory restore, device settings, device listening
- Keep alive utility verifies connectivity to the secured internet link
- Debugging console with filtering capabilities

## Advantages

- Full integration with existing customer application
- Compatible with all 3SI NextGen3 devices
- No need to train staff on 3SI Tracking website
- No additional user credentials required
- Globally accessible

3SI Security Systems offers proven GPS tracking solutions that combine aided GPS, Cellular and Radio Frequency (RF) location technologies with a secure tracking website. Available in a variety of designs to track all types of valuable assets, our system has led to the recovery of millions in stolen cash and assets.

Our cash protection solutions use ink, dye and smoke to help stop crime and catch criminals.

## Benefits of the 3SI API

- Streamlines technology
- Aids in evolving role of internal integration
- Improved efficiency
- Joint commitment to assets
- Future ready

## Professional Service

Innovative **Solutions** supported by a first class **Service** organization which pledges customer **Satisfaction** through products that perform.

- Fully online documented API
- Dedicated support team for API related requests
- Dedicated customer service team for assistance during deployments and operations
