

STAFF SAFETY for Retail Locations

SafeResource™ for RETAIL Locations

All types of stores, Jewelry, Electronics, Convenience, Pharmacy and even Quick Serve Restaurants, face growing security threats. One big challenge is protecting staff during opening and closing time, both popular times for robbers to target stores. They know the staff presence is minimal and without the presence of other customers as witnesses, crime becomes less risky.

Enter SafeResource...App technology that resides on a smartphone and is supported by a 24/7 Security Operations Center (SOC). The App links directly to the SOC to ensure that every step of the open and close process is completed safely. Data collected by the system is downloadable for reporting and audit. Together, the systems improve store safety, reduce costs, and provide comprehensive reporting and documentation of security protocols.

Improves Store Safety

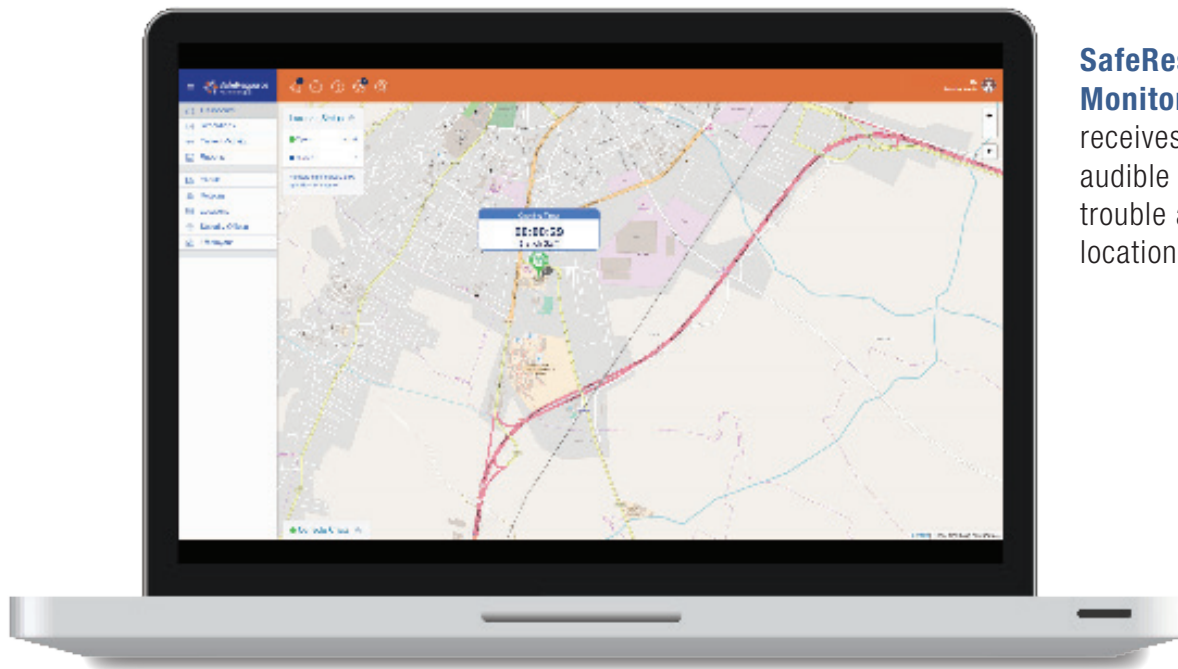

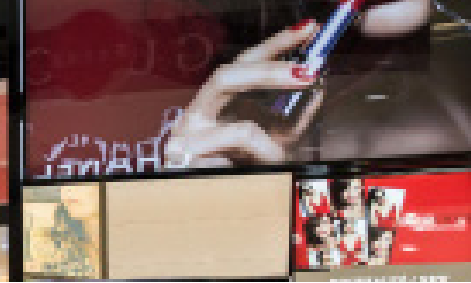

- Staff safely perform **automated and assisted** Store Opening and Closing from their smartphones
- If trouble arises, **staff access assisted video, call or chat** for immediate help and support
- Monitoring Center receives **visual and audible indicators of trouble**
- Trouble notifications are **automatic and covert** to keep staff safe
- **Staff are notified** of store status via App... confirms that store is safely opened, and can also be used for emergency notification

Documents & Reports Security Protocols

- **Records and saves all open/close activity** for future access
- **Task List** Function ensures all required procedures are followed and performed
- **Geofence around store** ensures activity is completed at the store location
- **App is secure:** password protected and tied directly to the user's store

SafeResource App
Works on Android
and iOS Devices

SafeResource Monitoring Console receives visual and audible indicators of trouble at any store location

Reduces Costs

Store personnel costs are reduced - **can safely open/close with one employee**

Easy and reliable access to records - **saves time in compiling reports**

Compliance audit **preparation takes less time**

Using App task list, Open & Close **activity can be completed more quickly** and consistently
