Innovation That Protects

Cash Tracker™ - Cassette

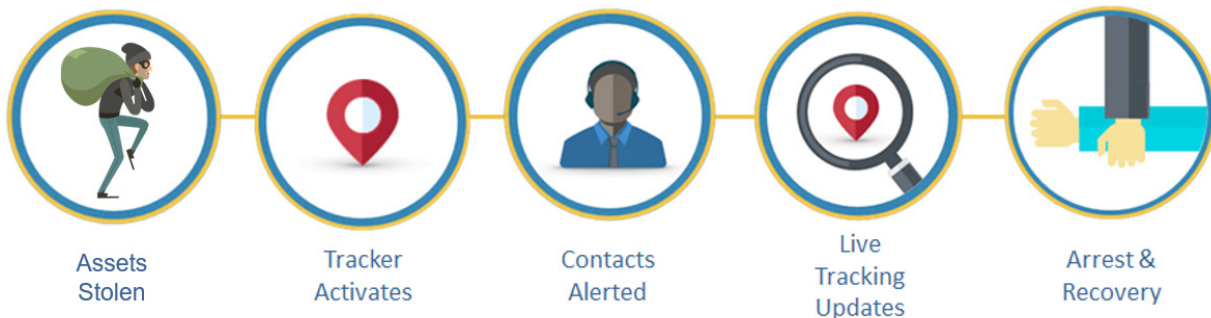

Powerful GNSS/GPS Tracking To Capture Criminals and Recover Stolen Assets

Cash Tracker - Cassette protects cash machines and the cash inside by being covertly integrated with the other cash in the cassette. It protects against theft of the entire cassette, or when the cash is removed from the cassette and stolen. Designed for ATM deployers who replenish and manage their own machine networks.

If a Theft Occurs... Cash Tracker - Cassette automatically triggers a silent theft alert when the cash is tilted past 30 degrees. Once activated, the tracking information is accessed by local law enforcement allowing safe pursuit and apprehension, and recovery of the stolen cash.

Features and Benefits
