

BRANCH SAFETY
AT YOUR FINGERTIPS
Designed exclusively for banks

Designed exclusively for financial institutions, SafeBanker improves branch safety and provides comprehensive reporting and documentation of security protocols.

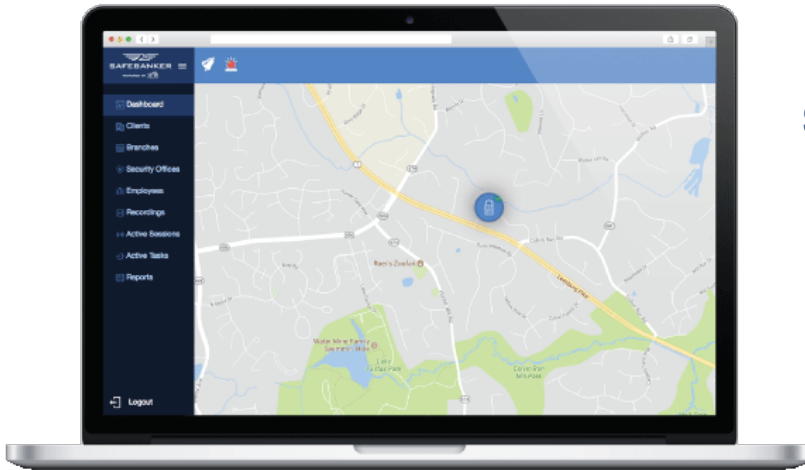

Using staff smartphones, SafeBanker's easy-to-use App automates branch open, close and service such as replenishing ATMs or retrieving night deposits. The App links staff directly to 24/7 security to ensure safety at every step of the process.

SafeBanker App

- Smartphone App **records activity and reports** to 24/7 Monitoring Center and Security Manager
- Staff perform **automated and assisted** Branch Open, Close and Service from their smartphones
- **Automatically logs** staff member, branch and time for each activity and reports to 24/7 security and security manager
- **Assisted video, call or chat** available for staff during activity - contacts 24/7 Monitoring Center directly
- PANIC sends a trouble notification to 24/7 Monitoring Center **automatically and covertly**
- **Staff are notified** of branch activity via App notifications
- **Check In/Check Out** Function records staff present at at each branch at any given time
- Ensures **uniform** open & close processes for all branches
- **App is secure:** password protected and tied directly to their branch

**SafeBanker App
Works on Android and iOS Devices**

SafeBanker Monitoring Console

- 24/7 Center **monitors activity** at all the branches
- **Audible and visual indicators** alert Monitoring Center staff
- **Monitoring Center responds** to abnormal activity and views cameras or other facility technology for responding
- Security management accesses Console for viewing activity, **set up details and reporting**
- **Trouble and panic notifications** are detailed to complete logging of the activity
- **Geofence around branch** ensures activity is completed at the branch location

#SaferWorld

SafeBanker Monitoring Console

The SafeBanker System is a Mobile Safety System designed specifically for Financial Institutions. The System protects employees during open, close and service, when they are most vulnerable.

SafeBanker limits liability, reduces costs, and ensures compliance with the Bank Protection Act.

The System is installed on staff smartphones that they carry every day and utilizes a secure console portal – it is that easy! No special hardware or complicated set-up needed.

Additional Features

- Full reporting capabilities via the Console
- Customizable set-up per client based on the operating schedule for each branch
- Staff “check-in” and “check-out” of branch so staffing levels are easy to monitor
